## Robotics Receives Scrap For FIRST Build

Gershow Recycling donates aluminum scrap and parts for club's robotic build.

By **Sara Walsh** February 15, 2011

Hauppauge Robotics team are getting scrappy as they build robot for their upcoming competitions.

Hauppauge Robotics Eagles members Nolan Conway and Ben Solaski traveled to Gershow Recycling in Medford to pick up donated aluminum scrap and parts for their upcoming Long Island For Inspiration and Recognition of Science and Technology Robotics Competition on Feb. 5.

Gershow presented the opportunity to various Long Island teams to receive free aluminum scrap and parts for held in building robots to complete given tasks. Hauppauge is one of three schools that took advantage of the offer.

These parts are being used as part of the Robotic Eagles' six week build to complete a robot to compete in Locomotion, a task in which robots must hang inflatable symbols on a rack to score points, in both independently and driver controlled portions.

For more information on the team and its upcoming competitions, visit their [website](http://www.team358.org/). (<http://www.team358.org/>)
